Emergency Overview

Appearance: *Clear, colorless solution*

Danger! Corrosive. Causes severe burns to eyes, skin, respiratory and gastrointestinal tracts. May cause kidney damage. May cause central nervous system effects. May cause cancer and reproductive effects.

Target Organs: *Eyes, skin, respiratory tract, gastrointestinal tract, blood, kidneys, central nervous system, reproductive system*

Potential Health Effects

Eye:

Causes eye burns.

Skin:

Causes skin burns. May be harmful if absorbed through the skin.

Material Safety Data Sheet Doctors Solution

Ingestion:

Causes gastrointestinal tract burns with nausea, vomiting, and diarrhea. May cause kidney damage. Ingestion of large quantities may cause central nervous system depression, severe hemolytic anemia, and hemoglobinuria.

Inhalation:

Causes chemical burns to the respiratory tract. May be harmful if inhaled. May cause effects similar to those of ingestion.

Chronic:

Prolonged or repeated skin contact may cause dermatitis. Prolonged or repeated exposure may cause adverse reproductive effects or visual disturbances.

Section 4 - First Aid Measures

Eyes:

Flush eyes with plenty of water for at least 15 minutes, occasionally lifting the upper and lower eyelids. Get medical aid at once. Do NOT allow victim to rub or keep eyes closed.

Skin:

Flush skin with plenty of water for at least 15 minutes while removing contaminated clothing and shoes. Get medical aid at once. Wash clothing before reuse.

Ingestion:

Call a poison control center. Do not induce vomiting unless directed to do so by medical personnel. If victim is conscious and alert, give 2-4 cupfuls of milk or water. Never give anything by mouth to an unconscious person. Get medical aid at once.

Inhalation:

Remove from exposure and move to fresh air immediately. If not breathing, give artificial respiration. If breathing is difficult, give oxygen. Get medical aid.

Notes to Physician:

The use of a metal chelator should be determined only by qualified medical personnel.

Section 5 - Fire Fighting Measures

General Information:

As in any fire, wear a self-contained breathing apparatus in pressure-demand, MSHA/NIOSH (approved or equivalent), and full protective gear. During a fire, irritating and highly toxic gases may be generated by thermal decomposition or combustion. Contact with metals may evolve flammable hydrogen gas.

Extinguishing Media:

For small fires, use dry chemical, carbon dioxide, or alcohol-resistant foam.

Autoignition Temperature:

Not applicable.

Flash Point:

Not applicable.

Section 6 - Accidental Release Measures

General Information:

Use proper personal protective equipment as indicated in Section 8.

Spills/Leaks:

Absorb spills with inert material (vermiculite, sand, fuller's earth) and place in suitable container labeled for later disposal. Material may be carefully neutralized to pH 7 with citric acid or other suitable neutralizing agent.

Section 7 - Handling and Storage

Handling:

Do not get in eyes, on skin, or on clothing. Do not ingest or inhale. Use only with adequate ventilation.

Storage:

Store tightly closed in a cool, dry, well-ventilated area away from incompatible materials.

Section 8 - Exposure Controls, Personal Protection

Engineering Controls:

Facilities storing or utilizing this material should be equipped with an eyewash facility and a safety shower. Use adequate ventilation to keep airborne concentrations below the Permissible Exposure Limits.

Exposure Limits:
